Mind-Blowing Cosmos

- The universe is estimated to be 13.8 billion years old, but the oldest known stars are only 13.6 billion years old. - Earth's rotation is gradually slowing down, adding approximately 1.8 milliseconds to each day every

century. - The Sun's mass is equivalent to approximately 330,000 Earths, yet it accounts for only 99.86% of our solar system's mass.

Astonishing Animal Kingdom

- The giant tortoise has the longest lifespan of any vertebrate species, with an average life expectancy of over 150 years. - Dolphins possess the ability to recognize themselves in a mirror, a trait shared by only a handful of other animal species. - The chameleon's tongue can extend to twice the length of its body, enabling it to snatch prey with remarkable speed.

Unbelievable Human Body

- The human brain can process information at a rate of approximately 10^{12} bits per second, far surpassing even the most powerful supercomputer. - Red blood cells are actually yellow-green in color, but hemoglobin molecules give them their characteristic red appearance. - The human body contains enough iron to forge a small nail, and enough zinc to galvanize a small bolt.

Unfathomable History

- The first recorded use of the word "computer" dates back to 1613, referring to a person who performs calculations. - The Great Wall of China is not actually visible from space, as popular belief suggests, due to its narrow width and color. - The Mona Lisa was stolen from the Louvre museum in 1911 and remained missing for two years before being recovered.

Exclusive Science

- The speed of light in a vacuum is approximately 299,792,458 meters per second, and it is the same for all observers, regardless of their motion. - Quantum entanglement allows two particles to remain connected, regardless of the distance between them, and changes made to one particle instantaneously affect the other. - The human body emits low-level radiation in the form of blackbody radiation, similar to the heat emitted by a light bulb.

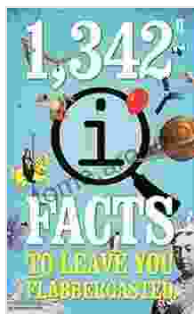

Thought-Provoking Miscellany

- The world's largest collection of rubber ducks is located in the town of Tarzana, California, and consists of over 5,600 ducks. - The average person spends approximately one year of their life waiting in lines. - The name "McDonald's" was originally intended to be "McDonald's Barbecue," but the word "barbecue" was dropped due to concerns over its negative connotations.

"342 Qi Facts To Leave You Flabbergasted Quite Interesting" is an extraordinary collection of facts that will captivate your mind and leave you craving for more. This book offers an unparalleled opportunity to expand your knowledge, ignite your curiosity, and marvel at the wonders of the world around you. From mind-boggling scientific discoveries to astonishing animal abilities and fascinating historical tidbits, this captivating read will undoubtedly leave a lasting impression on your intellect.

Whether you're a lifelong learner, a trivia enthusiast, or simply someone who appreciates the unexpected, "342 Qi Facts To Leave You Flabbergasted Quite Interesting" is the perfect companion to ignite your imagination and inspire a deeper understanding of our world. So, prepare

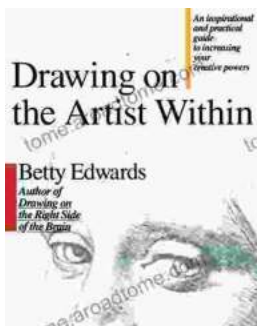

to be amazed, expand your horizons, and journey into the realm of the extraordinary today!
